We will thoroughly support your evacuation!

Information Distribution

You can check the same contents that are in the disaster prevention administration radio system both by voice and text! You can check disaster information anytime and anywhere.

Safety Confirmation

You can check the safety status of your family and friends in the event of a disaster, and you can check their last registered location on the map! If you register as a group in advance, you can also search all at once!

Area search Browse information

In addition to the disaster risk of your current location, you can browse useful information on the map in the event of a disaster!

- Evacuation shelter
- Sandbag station
- Underpass

Regional risk information

When your area reaches dangerous standards for inundation and sediment-related disasters which are set by each neighborhood association, you will receive "information to further compliment evacuation information."

Evacuation behavior

When evacuating, the direction towards the shelter and a line displaying the distance are shown! Also, if your current location is within the expected inundation area, you can use the AR function to check the inundation depth.

Multilingual support

Disaster prevention information and shelter information is translated into multiple languages!

- English
- Chinese
- Korean
- Portuguese
- Spanish
- Vietnamese
- Filipino

Disaster trivia

We will deliver information on disaster prevention such as evacuation tips and explanations of various weather terms!

Let's have fun with disaster prevention quizzes and learn about disaster prevention and mitigation together!
